

Australian NSD Known Issues list

Last updated: 03/02/2022

Flame Data export – impacts data export for Geoscience Australia Phase 2 Flame datasets from the 4th of May 2020 – both 10m lines and 2.1m lines.

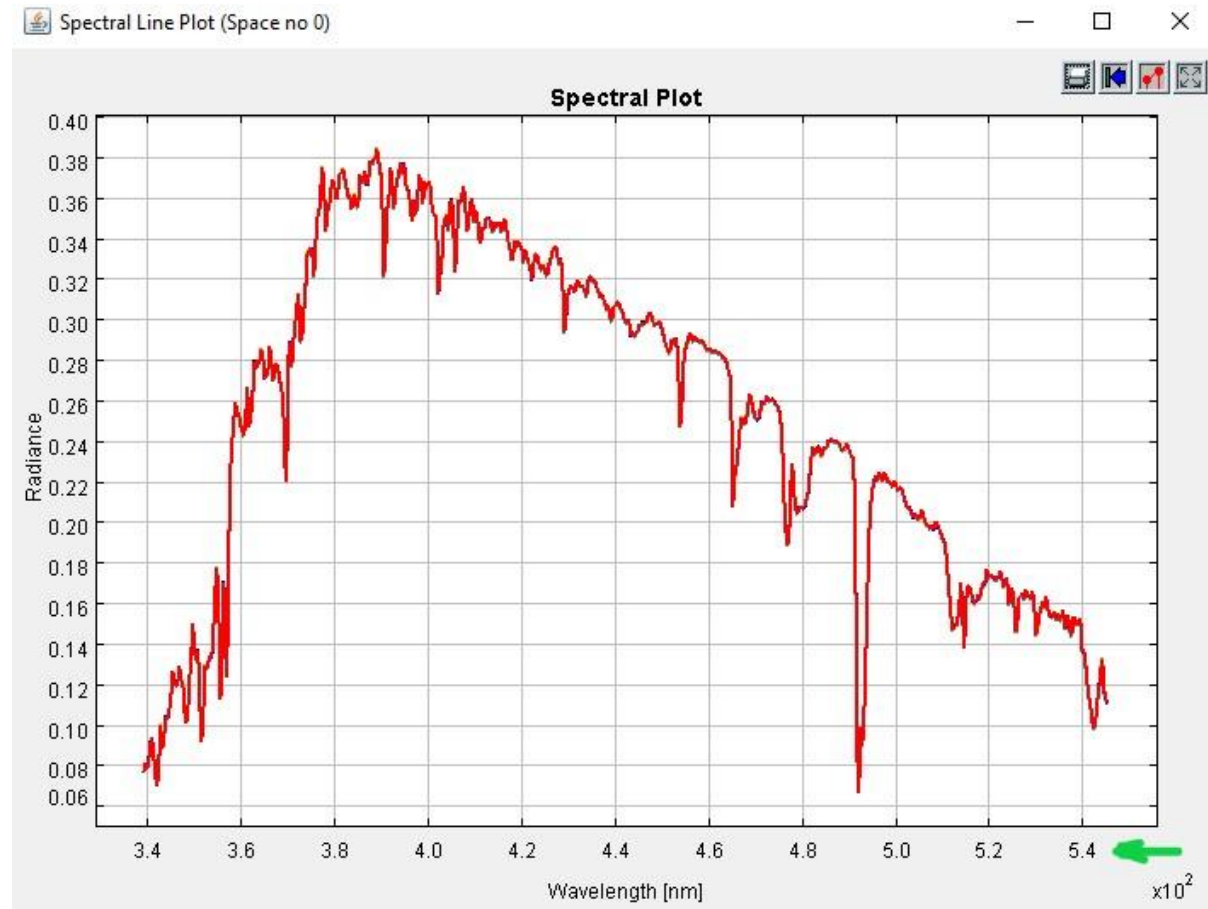

Issue: exporting or trying to view data for the 4th of May 2020 Flame dataset does not work, it stalls on plotting or downloading.

Workaround: None.

Status: work in progress, data may be corrupt.

Flame data Spectral Plot failure

Issue: The plot of Flame data results in the wavelength (x) scale displaying an incorrect scale.

Workaround: export desired spectra and plot via Excel or similar. The data are correct and the error lies with the plot in the Specchio client.

Status: being investigated.
